AVA product range extension

## Müller Quadax: Our partner for metal-seated butterfly valves

As a sales partner of müller quadax gmbh, we have added an important valve brand for the sector of metal-seated butterfly valves to our product range. The cooperation includes close collaboration in the field of stock valves as well as in the project business.

As the only one distributor in Europe, we offer the proven Quadax® butterfly valves in carbon steel quality from stock in Lug Type and Double Flanged version according to DIN and ASME standards.

*Lug Type butterfly valve with manual gearbox*

*Double flanged butterfly valve with manual gearbox*

**müller quadax gmbh**, as part of müller co-ax ag, has over 60 years of experience in manufacturing of industrial valves. Here the Quadax® four offset butterfly valves were developed, which established a new dimension of safety. Today, this innovative company has fully equipped 5-axis machining centers that ensure its production process is among the most advanced in the world. The company's extensive expertise also makes Quadax valves the resource of choice - especially in applications where extreme conditions dominate and uncompromising quality is essential. Safety through in-house production - 100% Made in Germany.

All valves, made by Quadax are produced exclusively in-house. This ensures both maximum safety and a high level of flexibility when it comes to special customized solutions and modifications for specific application areas. Products include metal-seated four offset butterfly valves (DN50 up to DN1800, PN10 up to PN160) in a variety of materials. These include steel, stainless steel, high alloys, and special materials for cryogenic applications. Of course, all products comply with the respective applicable national and international standards, which are comprehensively documented and certified.

## Best practice

Our cooperation with müller quadax is already showing initial success. In the air separator division at Linde, already many valves are used for the oxygen range and also the cryogenic range. Both ASA, our company for valve service, and müller quadax are approved for this services at Linde. Thus, joint projects can be handled strategically with high efficiency. Also in other segments, our reliable delivery times and the high quality of müller quadax products ensure sustainable success.
