## Cost effective soft seated Butterfly Valves

In order to be able to serve the general applications in the "Industrial Segment" with a cost-efficient valve, we have extended our product range with soft-seated concentric butterfly valves.

Thus, we now offer butterfly valves from our cooperation partner WEFLO. The valves are available from stock at short notice. An automation of these butterfly valves can be taken over by our service shop on request. WEFLO valves are certified acc. to DGRL 2014/68/EU and WRAS.

### Application

The main areas of application for these valves are media in the field of water supply, wastewater treatment, heating water circuits and other industrial supply piping systems where isolating is required.

### Specification

Size range	DN50-DN200
Pressure class	PN10/16, ASME class 150
Face to face	EN 558, Series 20
End connection	Wafer/Lug
Operation	10 Pos, Handlever, DN200 and higher with gear

### Materials

Body	GGG-45
Disc	Stainless steel (CF8/1.4308)
Seat	EPDM

### Approvals

PED 2014/68/EU  
WRAS

The current stock availability can be checked at our website: [www.ava-alms.com/our-products-range](http://www.ava-alms.com/our-products-range)

### About AVA:

For almost 50 years AVA® has been the leading wholesaler of industrial valves according to DIN and ASME standards in Europe. As a long-standing exclusive partner of the leading manufacturers worldwide, AVA serves customers in the chemical and petrochemical industries as well as plant engineering and power plant technology with industrial valves at short notice from four sales and warehouse locations in Germany, the Netherlands and Great Britain.
